## MOVE UPSTREAM

Investing in the mental health of employees requires a proactive approach to see ROI.

## MORE PROFITS

Addressing emotional well-being on a cultural level increases loyalty and engagement.

## MORE TIME

Providing leaders with training and support fosters transparency and reduces stigma.

## MORE CAPACITY

Healthy and happy employees miss less work, have more focus, and get more done.

**STIGMA** AND JOB CONCERNS ARE TOP REASONS PEOPLE SUFFER IN SILENCE

## COMPANIES FACE CHALLENGES

- 1 in 5 people currently live with mental illness.
- 80% of Americans never get the help they need.
- 87% of leaders don't receive mental health training.
- 69% of employees say they need more support.

We help reduce stigma and **drive engagement** through training, technology, and multiple touchpoints.

THAT WAS AMAZING!! I loved every bit of the manager training. Initial feedback from the entire HR team was it is just what we needed. - Heidi Payne @ Purple Mattress

## BLUNOVUS HAS SOLUTIONS

We show companies how to transform the way they and their leaders look at and care for the emotional well-being of their people and rather than solely focusing on it from a crisis level, we deliver on a CULTURAL level.

### 24/7 CARE CENTER ACCESS

Leaders, employees, and loved ones have unlimited access to CARE through the app, by phone or by text. They have the choice to remain anonymous and use CARE to decompress, receive support, or book higher levels of care (therapy).

### TRANSFORMATIONAL LEADERSHIP TRAINING

Managers receive evidenced-based training and education that improves communication, provides warning signs, and creates psychological safety for team members while helping leaders manage their own emotional well-being.

### ONLINE WELLNESS LIBRARY AND TRAINING PLATFORM

All managers, team members, and loved ones have 24/7 access to an ever-growing online library from experts in mental health, anxiety, substance abuse, grief and loss, resilience, leadership, relationships, stress, and finance.

### APP, TEXT MESSAGING SERVICE, AND DEEP ANALYTICS

Employees gain access to their company-branded app with one-touch access to the CARE Center and text messaging service built for team members and managers while leaders receive deep analytics on trends and employee engagement.
